

KRION® | COLORS

## SNOW SERIES

Mainly composed of minerals with a small percentage of high-quality acrylic resins, the Snow White KRION® finish completes the range of colors in the KRION® series. Snow White makes KRION® the ideal solution to adapt to any design project. Along with the rest of the KRION® colors and formats, it stands out for its additive-free anti-bacterial qualities, resistance, easy-clean finish and easily repaired nature.

# COLORS SERIES

The KRION® Colors series consists of a range of modern plain colors with excellent consistency and which only requires minimum maintenance. KRION® Colors guarantees all of its properties: antibacterial, repairable, seamless and thermoformable. When curved, KRION® Colors provides excellent results due to its elasticity, without its color being deteriorated in any way.

## NATURE SERIES

The colors in the KRION® Nature series have a natural appearance reflecting nature in its pure state. The composition of the Nature series includes a high degree of recycled KRION® along with the goals of achieving eco-friendly designs and the advancement of sustainable technology that KRION® is known for.

## STAR SERIES

The combination of colors in the KRION® Stars series provides a constellation of metallic highlights that are ideal for decorating according to the very latest trends in modern and spatial design.

7101. White Star

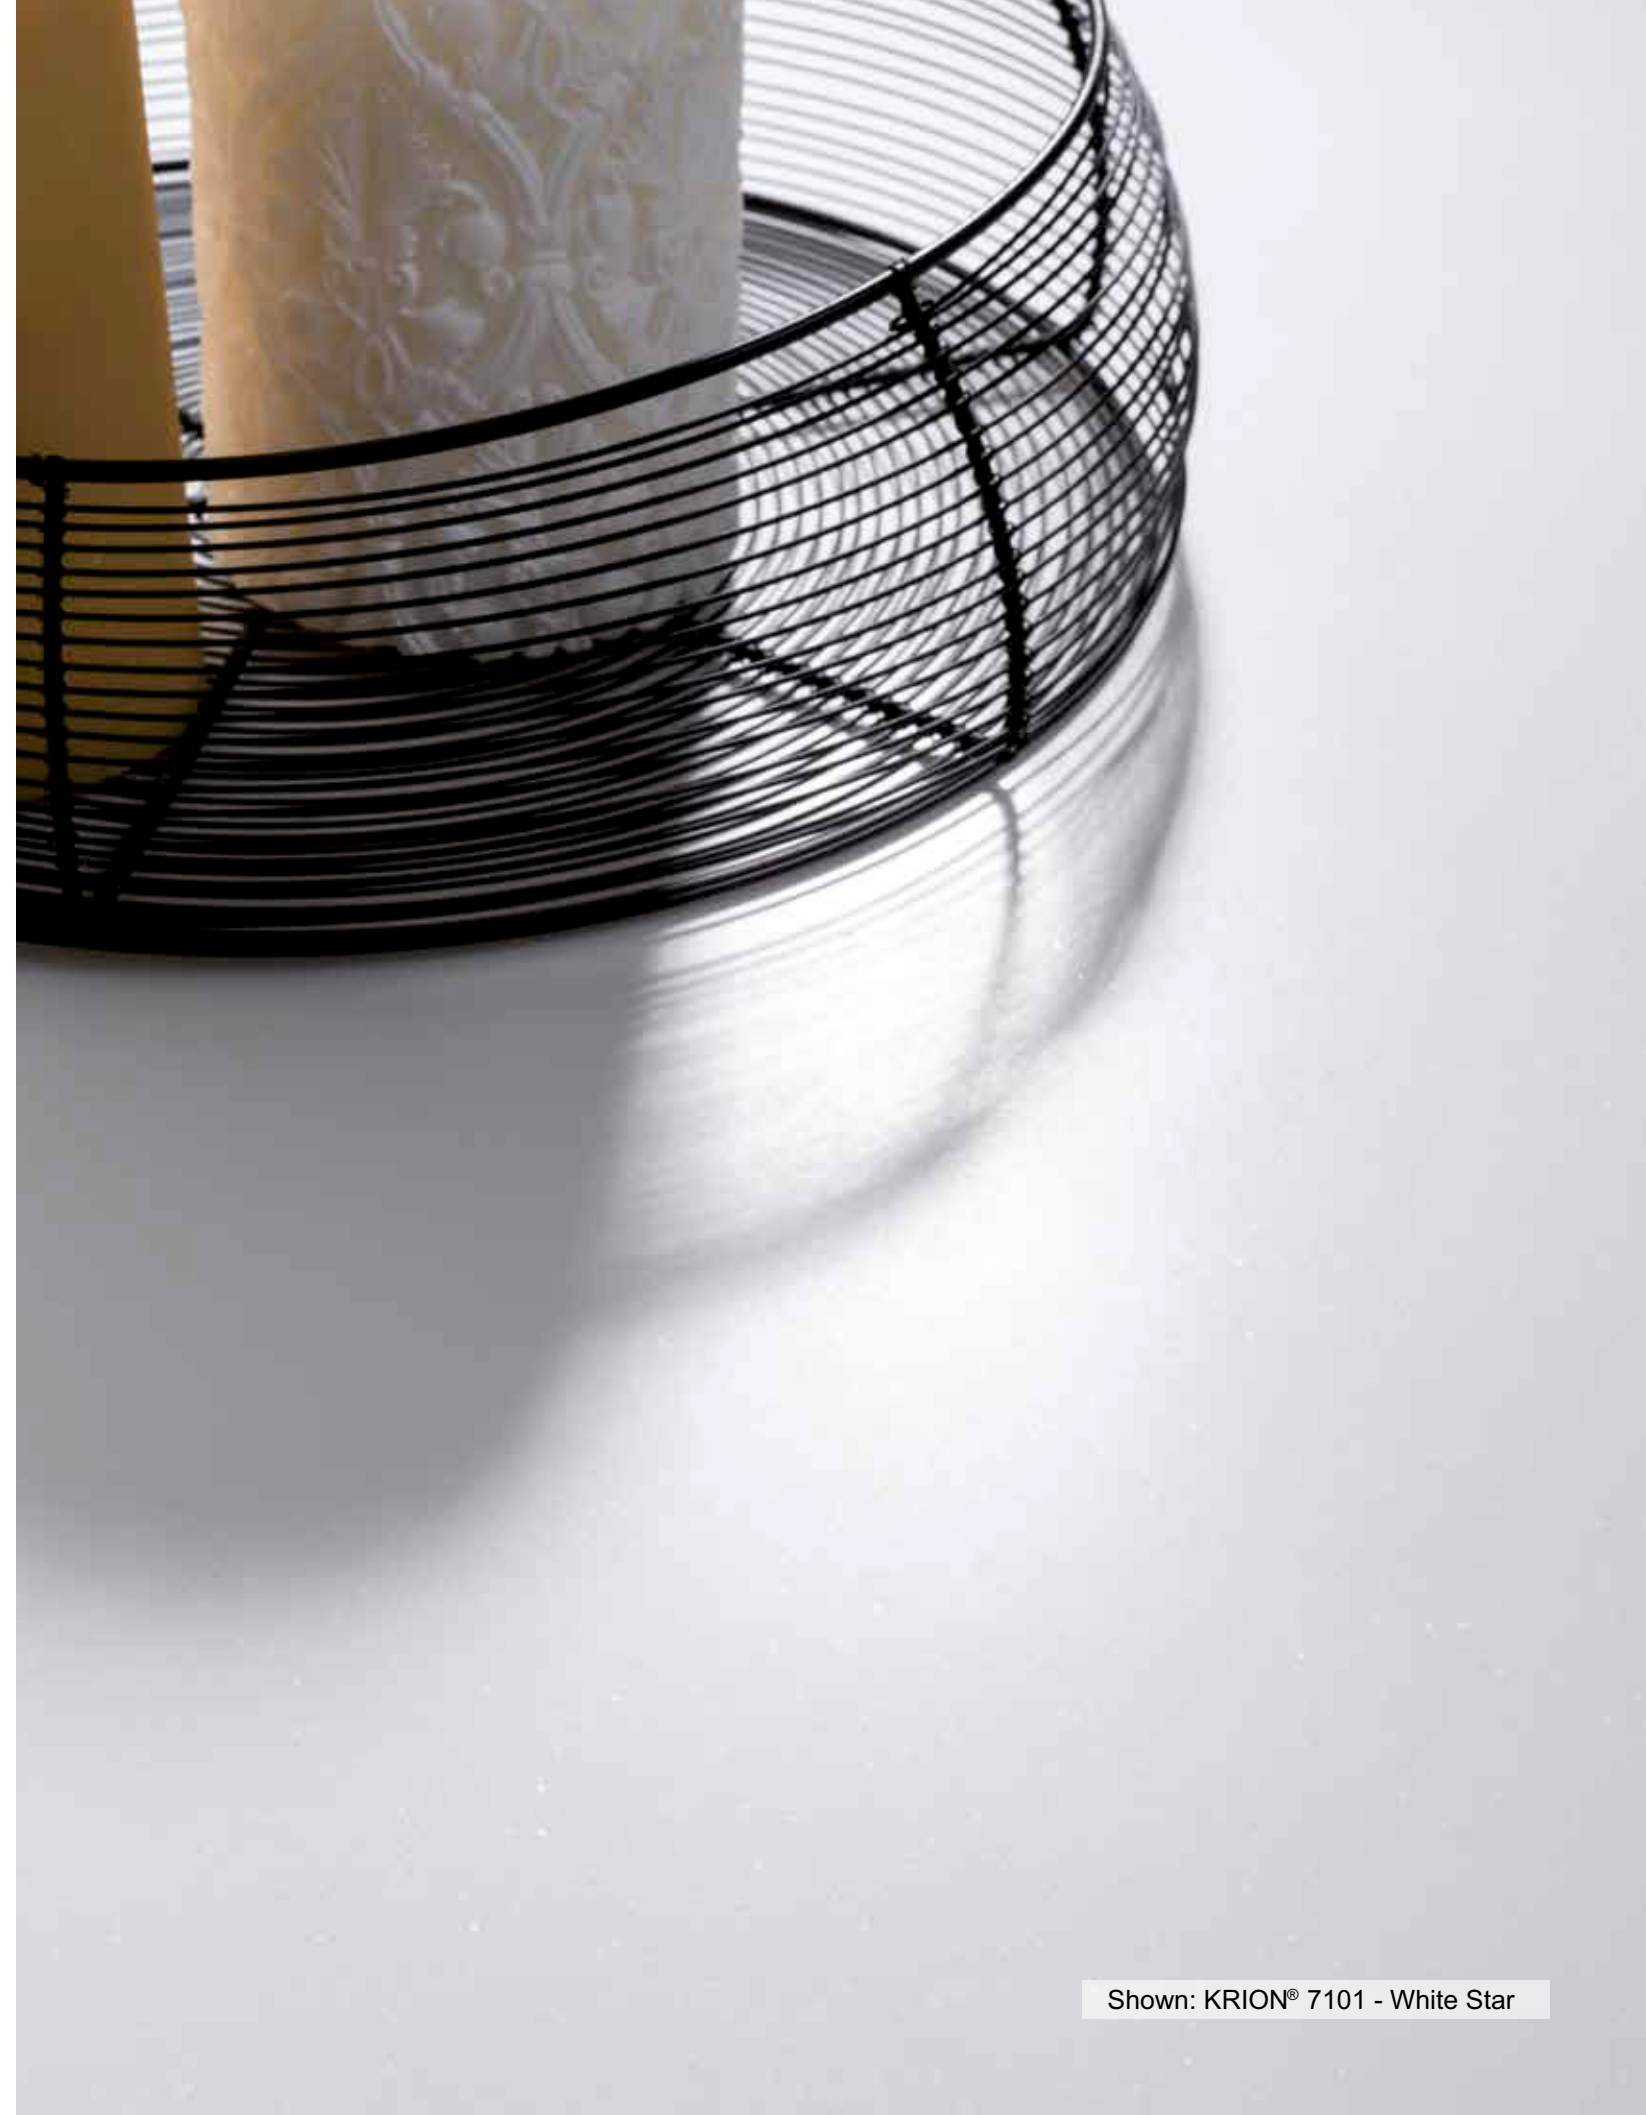

7102. Titanium Star

7901. Black Star

7902. Grey Star

Shown: KRION® 7101 - White Star

## ROYAL SERIES

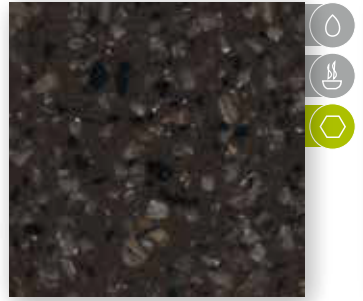

The KRION® Royal series is ideal for working surfaces that call for a similar appearance and qualities to natural stone, including crystalline particles but with all of the properties of KRION® without visible seams, and with the possibility of creating curves and rounded trims and edges. The Royal series provides continuity and uniformity throughout its entire range. The KRION® Royal series also guarantees all of the usual properties of the material: including its anti-bacterial, repairable, seamless and thermoformable qualities.

## ROYAL + SERIES

KRION® Royal + is the most innovative series in the KRION® line, due to its composition of alternating metallic and transparent particles. It is ideal for working surfaces that call for a similar appearance and qualities to natural stone, including crystalline particles, but is available with all of the properties of KRION® - including an appearance without visible seams, and the possibilities of creating curves, rounded trims and edges. The KRION® Royal + series provides continuity and uniformity throughout the whole range.

## LUXURY SERIES

The new LUXURY color series is inspired by nature's beauty. This KRION® series is available in four different finishes - all with a sophisticated stone-like appearance and the unbeatable properties of a KRION® solid surface. This new series features a carefully developed random veined pattern. Like all of the other KRION® colors, the pattern is the same throughout the entire thickness of the sheets, making them easy to repair while also allowing for the use of KRION® decorative techniques. The series also offers the assurance of the magnificent properties of a KRION® solid surface, including an absence of porosity, making it suitable for use in sterile environments, and the fact that the sheets can also be thermoformed.

KRION® has many potential applications, but it is important to bear in mind the fact that some colours are more appropriate for certain uses. We advise you to follow this table of recommended uses for the different colours.

Please consult the recommended uses of each color. The appearance and colour of the models may vary slightly with regard to the originals.

- |  |   |  |   |
|--|---|--|---|
|  | Recommended   |  | Suitable  |
|  | Bathroom elements for any application: countertops, wall coverings, baths, shower trays, etc. |  | Exteriors such as balconies, gardens or commercial façades. They have acceptable behavior.                        |
|  | Kitchen elements for any application: countertops, wall coverings, etc.                       |  | Ventilated façades exteriors and interiors, regardless of their height or geometry. The best choice for outdoors. |
|  | For all types of decorations where the surface is not subject to intensive use.               |  | Backlighting: For backlit decorative features.  |
